## High Impact Math Strategies PK-12 Math

In this session for teachers of mathematics in grades K through 12, participants will practice research-based, active learning strategies to model and reinforce a variety of math skills. Using ideas from Hattie's Visible Learning for Mathematics, teachers will learn to combine explicit instruction, vocabulary, and conceptual understanding so that students create their own learning. Learn how to use highly engaging and effective activities to bring mathematical concepts to life with your students and to optimize their learning.

Instructors will share strategies and resources to support participants in instructional planning, use of assessments, and creating a challenging environment (TKES Standards 2, 5, and 8) that will positively impact teacher practice and student achievement.

<b>Date:</b>	June 12, 2024
